Callback requests

Completion Rate	98.9%
Avg Wait for CB	3h 12m
POD4 Wait (best)	58m 36s
Client Support Wait	6h 2m

§ 02 Monthly Analysis

February showed *consistent staffing gaps on voice* across all POD queues, while chat and callback channels performed significantly better — suggesting members are successfully self-routing to alternative channels when voice wait times are unacceptable.

Voice remains the critical gap. With a 51% answer rate and 20.8% abandon rate across 2,304 offered contacts, nearly half of all voice contacts went unanswered. All four POD voice queues fell below 19% SL against an 80% target — a pattern suggesting systemic under-staffing or routing misconfiguration rather than isolated incidents.

Chat is performing well on volume but poorly on SL. 85.1% of 1,295 chat contacts were answered, but SL ranges from 0.3% (POD2) to 35.4% (POD1), with handle times of 1–2+ hours — pointing to agent multitasking or complex issue resolution in the chat channel.

Callback is the standout channel at 98.9% completion. While wait times for callbacks are long (3h 12m average), members who choose this path are nearly always reached — a positive member experience story worth highlighting.

- **Critical:** Voice POD queues — 2.5%–18.3% SL vs. 80% target all month
- **Critical:** Health Care Coordinators 30.9% answer rate, 5m 47s ASA
- **Warning:** Chat SL below target in all 4 queues — POD2 at 0.3%
- **Warning:** POD2 email avg wait 2+ days — backlog management needed
- **Warning:** 3 agents with anomalous AHT/ACW data — system audit required
- **Positive:** Callback 98.9% completion — strong follow-through
- **Positive:** Client Support voice leading at 50.1% SL — benchmark this team
- **Note:** Miguel Garcia handled 754 contacts at 7m 41s AHT — organization's top performer

§ 02 Chat Queue Detail

SL Target: 80%

QUEUE	OFFERED	ANSWERED	ANS %	ASA	AVG WAIT	SERVICE LEVEL	AVG HANDLE	AVG TALK	AVG ACW	HOLDS
Care Exp. POD1 Chat Best SL this month	238	212	89.1%	28m 33s	26m 43s	35.4%	1h 8m	5m 44s	59m 34s	146
Care Exp. POD2 Chat ⚠ SL 0.3% — critical	353	296	83.9%	1h 15m	1h 9m	0.3%	1h 8m	4m 1s	1h 1m	232
Care Exp. POD3 Chat	257	211	82.1%	1h 19m	1h 11m	7.6%	2h 25m	4m 33s	2h 23m	133
Care Exp. POD4 Chat Best ASA this month	447	383	85.7%	19m 40s	17m 46s	26.6%	1h 2m	5m 26s	54m 14s	277
All Chat Queues	**1,295**	**1,102**	**85.1%**	**47m 50s avg**	**43m 58s**	**17.6% avg SL**	**1h 21m**	**4m 56s**	**1h 13m**	**788**

Note: Chat ACW is significantly elevated (54m–2h 23m) across all queues, while avg talk time is only 4–6 minutes. This indicates agents may be handling follow-up research or documentation in ACW state. Review whether ACW is being used correctly or if work is being deferred post-chat.

§ 01 Callback Queue KPIs

February 2026 · 704 requests

TOTAL REQUESTS	COMPLETION RATE	AVG WAIT FOR CB	WORST WAIT
704	**98.9%**	**3h 12m**	**6h 2m**
Callback contacts	696 of 704 completed	Time before callback placed	Client Support (New)
	↑ Excellent	Long but completing	⚠ Review staffing

§ 02 Callback Queue Detail

QUEUE	OFFERED	COMPLETED	RATE	AVG WAIT FOR CB	SERVICE LEVEL	AVG HANDLE	AVG TALK	AVG ACW	XFERS
Care Exp. POD4 Voice Best wait time	72	72	100%	58m 36s	1.4%	23m 17s	22m 7s	1m 40s	—
Care Exp. POD1 Voice	68	65	95.6%	2h 13m	0.0%	1h 6m	1h 5m	6s	1
Care Exp. Team Voice	158	157	99.4%	38m 19s	1.3%	2h 30m	2h 4m	35m 19s	1
Care Exp. POD2 Voice	62	61	98.4%	3h 42m	1.6%	4m 41s	3m 56s	27s	1
Health Care Coordinators ⚠ ACW 10h 26m — anomaly	111	110	99.1%	3h 11m	0.9%	1h 31m	22m 12s	10h 26m ⚠	—
Care Exp. POD3 Voice	64	62	96.9%	5h 5m	0.0%	13m 32s	11m 29s	3m 48s	1
Client Support (New) ⚠ 6h 2m wait — longest	169	169	100%	6h 2m	0.6%	7m 6s	5m 37s	38s	1
All Callback Queues	**704**	**696**	**98.9%**	**3h 12m avg**	**0.9% avg SL**	**1h 0m**	**42m 41s**	**49m 4s**	**5**

Note: Callback SL metrics are near 0% across all queues. This is expected behavior — the SL clock starts at the time of the original abandoned/routed contact, not when the callback is placed. The key metric is completion rate (98.9%), which is excellent. HCC ACW of 10h 26m is a data anomaly — flag for Genesys admin review.

⚠ Anomalous rows (Katrina Cruse, Chelsey Wilson, EuKyta Little) are dimmed. Verify Genesys wrap-up state configurations — agents may be leaving ACW open after interactions. Exclude from team averages pending system audit. Jeanette Burrell (5 answered) omitted from ranked table — insufficient data.

§ 01 Manager Action Items

Prioritized · February findings · Due by Mar 14

URGENT

Voice POD Staffing & Routing Audit

All four POD voice queues missed the 80% SL target by a wide margin all month (2.5%–18.3%). Pull Genesys schedule adherence reports for February and validate Architect routing configurations. Determine if contacts are being offered to queues that are understaffed during peak hours.

SL range: **2.5% – 18.3%** · Target: **80%** · Month-long pattern

URGENT

Health Care Coordinators — Capacity Crisis

Only 30.9% of 249 offered voice contacts were answered, with a 5m 47s ASA and 24.5% abandon rate. This queue is significantly under-resourced relative to demand. Evaluate adding cross-trained agents, adjusting schedules, or implementing overflow routing to Care Experience Team Voice during peak periods.

Answer Rate: **30.9%** · Abandon: **24.5%** · ASA: **5m 47s**

URGENT

Fix Genesys Wrap-Up State Configurations

Three agents (Katrina Cruse, Chelsey Wilson, EuKyta Little) show ACW values ranging from 2h 34m to 11h 48m — physically impossible for normal operations. Audit Genesys wrap-up code configuration to ensure ACW automatically closes after a set timeout. Review whether agents are manually staying in ACW.

Max anomalous ACW: **11h 48m** · Affected agents: **3** · Also flag HCC callback ACW: **10h 26m**

HIGH PRIORITY

Reduce ACW — Coaching for Key Agents

Excluding anomalies, Rashidah Brown (23m 49s), Tatiana Jean-Louis (32m 12s), and Ashley Andrus (13m 28s) have ACW far exceeding their avg talk time. Schedule 1:1 coaching sessions, review CRM screen-pop effectiveness, and standardize post-call documentation procedures across the team.

Brown ACW: **23m 49s** · Jean-Louis: **32m 12s** · Andrus: **13m 28s**

HIGH PRIORITY

POD2 Email Backlog — 2+ Day Wait

POD2 Email has an average wait time of 2 days 1 hour 51 minutes and a 29.3% SL. While the queue is processing more than it receives (239 handled vs. 208 offered), the backlog is clearly large. Assign additional agents to email triage, implement priority routing for aging emails, and set a clear backlog SLA target for March.

Avg wait: **2d 1h 51m** · SL: **29.3%** · Target: **80%**

HIGH PRIORITY

Chat SL Below Target — POD2 Critical at 0.3%

POD2 Chat answered 83.9% of contacts but achieved only 0.3% SL — meaning virtually all answered contacts were already outside the SL window when answered. Combined with 1h 8m AHT, agents are likely overloaded with concurrent chats. Review concurrent chat limits per agent and consider adding dedicated chat staff during peak windows.

POD2 SL: **0.3%** · Avg ASA: **1h 15m** · AHT: **1h 8m**

MEDIUM

Investigate Transfer Volume — 145 Monthly

145 total transfers across all agents in February, with Miguel Garcia (76) and Rashidah Brown (31) accounting for the majority. Pull Genesys Interaction Details to identify the most common transfer destinations and reasons. Update skills-based routing profiles to reduce first-contact transfer failures.

Total transfers: **145** · Garcia: **76** · Brown: **31** · Andrus: **14**

MEDIUM

Reduce Callback Wait Times

While the 98.9% callback completion rate is excellent, members are waiting an average of 3h 12m before receiving their callback — Client Support waits 6h 2m. Set internal SLA targets for callback wait times and share daily callback queue depth reports with supervisors to ensure timely processing.

Avg wait: **3h 12m** · Client Support: **6h 2m** · Completion: **98.9%**

OPPORTUNITY

Scale Client Support Practices Org-Wide

Client Support (New) achieved the highest voice SL at 50.1% and strong callback completion. Conduct a structured analysis of their scheduling model, routing configuration, agent skill profiles, and team practices. Create a replication playbook for POD queue managers — Client Support is the closest to best-in-class this month.

Voice SL: **50.1%** · Answer Rate: **60.0%** · ASA: **2m 51s**
